

jigsaw unintended bias in toxicity classification

Study: jubias | jubias-continuous-auc-v1

Paired effects · Dots: experimental pairs. Diamond/bar: mean and 95% paired t interval ($n \geq 2$).

Best verified completed validation result per run; 4/10 input runs excluded. 3 pair(s) flagged: agent model unknown, best pointer differs from verified optimum, budget seconds unknown, gpu differs, start commit differs. Descriptive comparison; trials are not independent repeats.
